

RFQ WORKSHEET

# Welded Mine Mesh RFQ Specification Sheet

Use this worksheet to record buyer-approved purchasing and manufacturing inputs. It does not select a support system, determine site suitability, or replace the approved drawing, specification, or qualified engineering decision.

## 1. Basic Order Information

|                           |       |
|---------------------------|-------|
| Buyer / RFQ reference     | _____ |
| Required quantity         | _____ |
| Delivery destination      | _____ |
| Requested delivery window | _____ |

## 2. Mesh Opening / Spacing Convention

|                              |                                                                              |
|------------------------------|------------------------------------------------------------------------------|
| Measurement convention       | Clear aperture / clear opening [ ] Wire pitch / centre-to-centre spacing [ ] |
| Required value - direction 1 | _____                                                                        |
| Required value - direction 2 | _____                                                                        |
| Drawing / specification      | Document number: _____ Revision: _____                                       |

Record the value and convention exactly as defined in the buyer-approved document. If the convention is unclear, keep it as an open item for buyer confirmation.

## 3. Wire Diameter

|                            |       |
|----------------------------|-------|
| Nominal wire diameter      | _____ |
| Tolerance                  | _____ |
| Wire profile, if specified | _____ |

## 4. Panel Dimensions

|                       |                                                 |
|-----------------------|-------------------------------------------------|
| Panel length          | _____                                           |
| Panel width           | _____                                           |
| Dimensional tolerance | _____                                           |
| Permitted variation   | None [ ] As defined in approved document: _____ |

## RFQ WORKSHEET

# Material, Weld, Finish and Packing Inputs

## 5. Material and Weld Requirements

|                           |                                                                                                                   |
|---------------------------|-------------------------------------------------------------------------------------------------------------------|
| Material grade / standard | Grade: _____ Standard and edition: _____                                                                          |
| Material certificate      | Required <input type="checkbox"/> Not required <input type="checkbox"/> Buyer to confirm <input type="checkbox"/> |
| Weld test method          | _____                                                                                                             |
| Sampling scope            | _____                                                                                                             |
| Acceptance criteria       | _____                                                                                                             |

## 6. Surface Treatment / Finish

|                                 |                                                                                                                   |
|---------------------------------|-------------------------------------------------------------------------------------------------------------------|
| Required finish                 | Exactly as stated in approved order: _____                                                                        |
| Coating requirement             | Mass / thickness / other: _____                                                                                   |
| Inspection criteria             | _____                                                                                                             |
| Finished dimension / mass check | Required <input type="checkbox"/> Not required <input type="checkbox"/> Buyer to confirm <input type="checkbox"/> |

## 7. Packaging and Container Loading

|                           |                                    |
|---------------------------|------------------------------------|
| Maximum bundle weight     | _____                              |
| Identification / marking  | _____                              |
| Handling / packing method | _____                              |
| Container type / payload  | _____                              |
| Destination constraints   | Buyer / importer to confirm: _____ |

### RFQ HANDOFF

Send the buyer-approved drawing or specification, this completed worksheet, quantity, inspection requirements, packing instructions and destination inputs for manufacturability review and quotation.
